Construction Anomalies Reported to GSA

Thursday 14 November 1985

One employee from Rudd Pest Control Company claimed he sprayed 2800 gallons Chlorodane solution on a portion of the gravel in the south end of the building foundation. He further claimed the tank in his van held 400 gallons (approximately 3400 lbs.) and that he refilled the tank a maximum of two times and completed the job in four hours. (Quite a feat and quite a van).

Friday 15 November 1985

Three CENTEX employees claimed the fumes from the Chlorodane spraying on 14 November had irritated their throats and chests.

Saturday 16 November

The Pierce Company had requested security coverage for one man to work in the company trailer. The individual did not enter the compound.

CENTEX had requested access for the office staff to work 8 hours on Saturday. Three persons came in:

John Milhausen	0700	departed 1200
Larry Brown	0800	departed 1130
Dianne Swanson	1020	departed 1401

GSA (Fred Bain) refused a request from Mr. Coakley to work since they had not shown up on previous Saturdays after requesting overtime coverage.
